

swanstone

forming partnerships in the plastics industry

As longstanding partner and representative for well known European manufacturers, Swanstone Ltd prides itself on providing superior quality production equipment, comprehensive technical services, ancillary products and consumables to the thermoforming industry. One of few suppliers able to offer full turnkey services. Being centrally located in the Midlands area with easy access to all main motorways and a number of airports, distance is no obstacle.

Technical Services and Spare Parts

Swanstone has developed a full preventative maintenance program to ensure the equipment continues to run effectively throughout its design life and to limit down time as far as possible. We are proud to have a longstanding team of experienced engineers and service support personnel at the disposal of our customers anywhere in Europe, UK & Ireland.

We offer a wide range of services, such as:

- Scheduled servicing & machine maintenance
- Breakdown assistance and fault finding
- Supply of spare parts
- On-site training courses (tailored to customer needs)
- On-site CNC programming and program optimising
- Machine safety inspections
- Machine valuations and refurbishments, etc.....

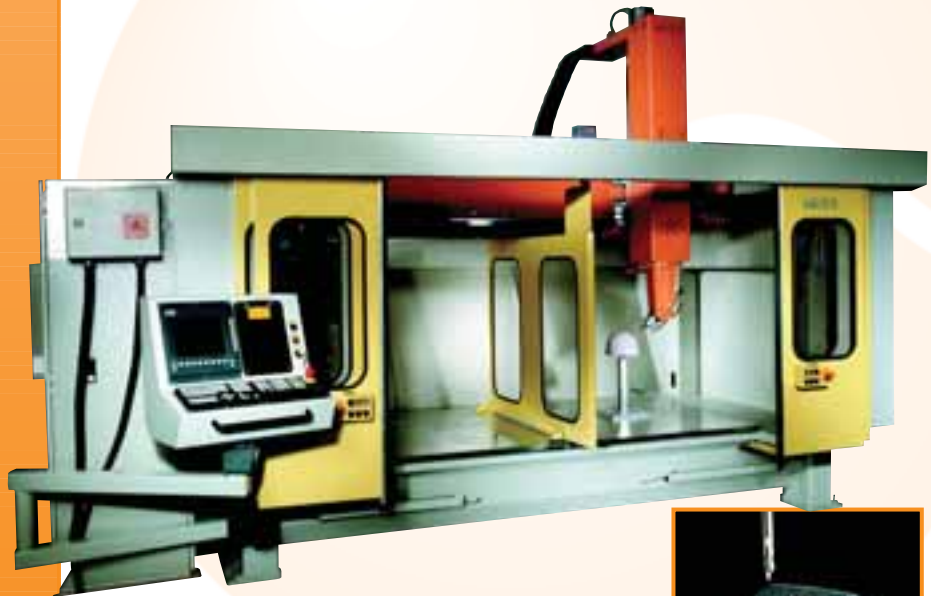

Our efficient spare parts department carries a comprehensive stock of spare parts with the possibility of same or next day delivery service if required to ensure that machines are functioning again as quickly as possible.

With a combined knowledge of the Thermoforming Industry totalling over 50 years, the Swanstone Team is a partner that can be relied on.

CNC Trimming

High performance CNC trimming equipment offering solutions to a wide range of application needs. These machines can be equipped with a variety of different table configurations such as rotary table, fixed bed, sliding twin tables etc. to suit customer applications as well as being able to operate with 2 Z-axes for simultaneous trimming of two components. Linear drives for higher speeds and a comprehensive list of optional equipment such as tool changer, tool making equipment etc. are also available. CNC centres can also be ordered with Ultrasound cutting units for finishing of specialist applications such as cutting break lines into airbags etc. For trimming edges and separating of components, GEISS also manufacture reliable horizontal bandsawing equipment.

- Vacuum Forming Machines • Packaging Equipment
- CNC Trimming Machines • CNC Ultrasound Cutting Centres
- Horizontal Bandsaws • Thermoplastic Materials
- Machine Maintenance and Servicing • CNC Programming
- Training Courses • Technical Advise • Spare Parts

Packaging

Our extensive range of blister forming and sealing equipment provide solutions for all requirements. We can offer small compact machines for low volumes as well as larger automated in line systems for high volume production. Packaging machines already supplied worldwide produce: shaped blisters, cups and trays, medical blisters, pharmaceutical blisters etc.

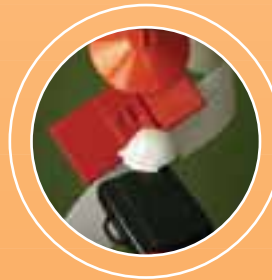

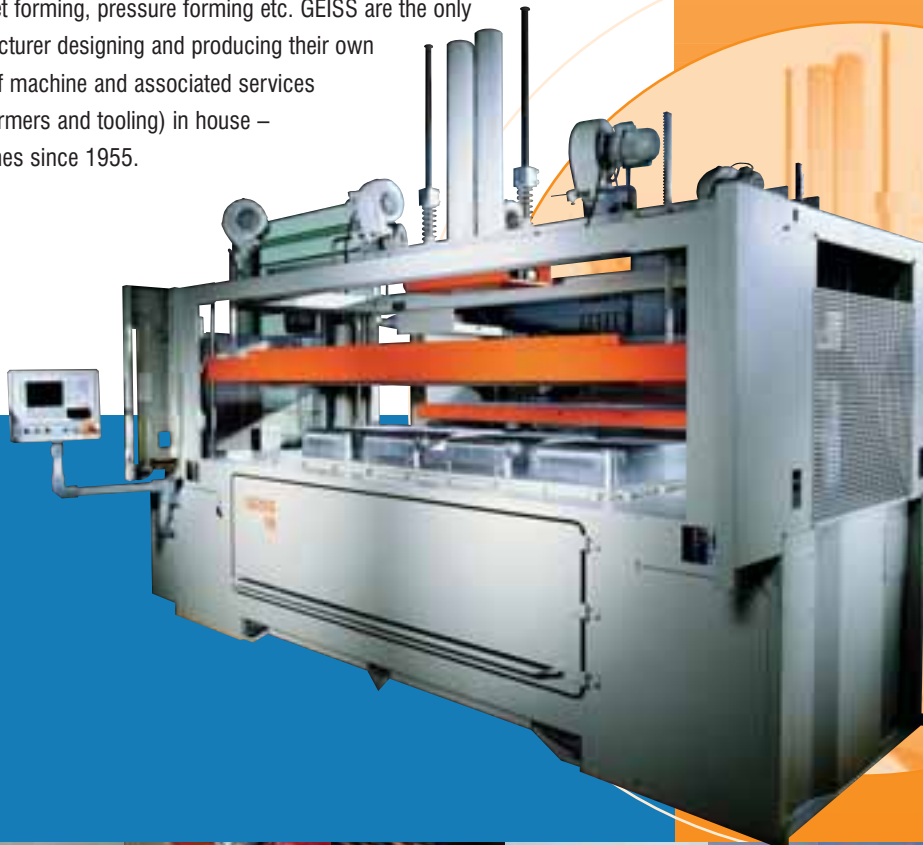

Our range covers all industries:

- medical • pharmaceutical • cosmetics • household • hardware • stationery etc.

The machines are manufactured in Europe to highest quality standards and we can also offer special custom made machines to provide full turnkey solutions, including packaging design, tool manufacture, engineering back up and supply of consumables (spare parts, materials etc.).

Vacuum Forming

Heavy duty compact systems manufactured to highest quality standards using latest technology by GEISS in Germany. These machines are capable of forming **ANY** material in **ANY** thickness. Machines are built to customer needs to any size required with a considerable level of optional equipment available to enhance performance or higher degree of automation. Applications include standard sheet and reel fed vacuum forming, twinsheet forming, pressure forming etc. GEISS are the only European manufacturer designing and producing their own complete range of machine and associated services (CNC, Vacuum formers and tooling) in house – producing machines since 1955.

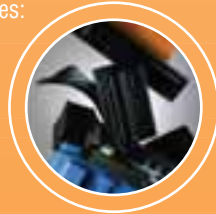

Thermoplastic Materials

High quality plastic materials manufactured in Italy by ILPA-MP3 offering modern production plant and latest computerised systems for production management and quality control. The success of MP3 products is based on technical experience and versatility, combined with undisputed quality.

Our portfolio includes:

- HIPS
- ABS/ PMMA
- ABS
- PET reels
- Barrier films

Application possibilities with our material are vast and we are always pleased to receive enquiries for innovative products.
